

To Whom It May Concern:                      This is in regards to the NAB's petition 04-160. I am an over the road truck driver and use the traffic and weather stations for the different cities in order to do my job. I think it is a good service and should be left on sattelite. It makes my job easier and keeps me informed of any problems ahead and makes it safer for me and other travelers on the highway.

I respectfully urge you, the FCC to reject this petition and not allow them to take our information from us, the truck driver and the motoring public .

XM Radio is a very infromative way of reaching people who are away on business or on vacation or otherwise. We pay for this service and shouldn't be told what we can listen to.

Respectfully yours,

Rex W. Walk
